HOW WE WORK

A Professional B2B Process

Corporate art is a long-term relationship. Every engagement is approached with the professionalism of a B2B partner, not a gallery transaction. Timelines, budgets, logistics, and aftercare are handled as carefully as the artwork itself.

01

Discovery

We discuss your space, brand identity, aesthetic brief, budget, and timeline. No obligation. The first conversation is always exploratory.

02

Curation / Concept

A curated selection of existing works or a bespoke commission concept is proposed, matched to your environment and objectives.

03

Production

Artwork is produced to confirmed specification: print format, edition size, framing, and scale agreed and signed off before production begins.

04

Delivery & Install

Works are delivered and installed on time, on budget. Full certification, care documentation, and ongoing support provided.

Corporate art projects typically take 4 to 16 weeks from brief to installation depending on scope. Commission and print enquiries welcome at any stage.
